

DESIGN CYCLE

Design Cycle is a process by which students explore different possibilities and look at the constraints with creating products or systems. This allows students to go through the Inquiring, Developing, Creating and Evaluating process until they end up with an outcome that is successful with and they are satisfied with.

At the heart of the MYP Design Cycle is Inquiry and problem solving which enable students to analyze, develop solutions, test and evaluate to get to a final outcome.

At Lakeside Academy the Design program can be found:

- MYP 1(Sec 1) - incorporated into English
- MYP 2(Sec 2) - incorporated into Science
- MYP 3(Sec 3) - Media
